

Liquid Probes

Index has developed two liquid sensing probes to improve the reliability and operation of your vehicle. Coolant level probes can increase the overall longevity of your vehicle engine. Water-In-Fuel probes keep your engine running smoothly without costly repairs or downtime.

Coolant Level Probes

Index heavy-duty Coolant Probes are single-terminal, case-ground sensing probes that sense proper fluid levels. The driver is notified of dangerously low level conditions.

Standard Fittings: 1/4" NPT, 3/8" NPT, and 9/16" UNF

Terminal Styles: Single threaded post with nut.

Operating Temperature Range: -40 °F to 257 °F (-40 °C to 125 °C)

Part Number	Thread Size	Terminal Type
8034100	3/8"	Single Terminal
8034101	1/4"	Single Terminal

Water-in-Fuel Probes

Index Water-in-Fuel Probes ensure the engine will not falter due to improper liquids entering the engine. The driver is notified when water has collected in the fuel filter housing and can remove the water before it causes problems.

- ◆ Brass housing or stainless steel
- ◆ Designed for A/C or low duty cycle plum D/C current
- ◆ Single pin or dual pin
- ◆ Internal resistor available on two pin
- ◆ Designed for low voltage applications
- ◆ Tested to ensure long life in coolant
- ◆ Operating specifications available on request

Part Number
8034107

t: 1-800-726-1737
